MATH 15900 is an intensive review of college algebra and trigonometry. A working knowledge of the concepts of college algebra and trigonometry is essential for all parts of science, engineering, and technology. Many other courses, (e.g. business, economics, health sciences, and more), will require you to apply the mathematical tools you learn in your college algebra and trigonometry courses, so keep in mind that success in future courses may depend heavily on your ability to apply the material from MATH 15900.

OFFICIAL PREREQUISITE/COURSE DESCRIPTION: MATH 15900 Precalculus (5 credits) P: MATH 11100 (with a minimum grade of B) or placement. Fall, Spring. 15900 is a one-semester version of 15300-15400. Not open to students with credit in 15300 or 15400. 15900 covers college-level algebra and trigonometry and provides preparation for 16500, 22100, and 23100. NOTE: All math courses have a prerequisite. The prerequisite can be met by Math Placement up to MATH 16500.

MORE ON PREREQUISITES: It is assumed that you have recently mastered the material of MATH 11100 (Algebra) with a grade of B or better within the last year or have placed directly into MATH 15900 by your placement score. If this is not the case, then you should talk to your instructor as soon as possible to decide if this is the correct class for you. The main reason people have difficulty with MATH 15900 is because of insufficient background. Again, if you are not sure if this is the right class for you, talk to your instructor early. It is not difficult to determine which class you should be in. If you feel the pace of MATH 15900 is too fast for you, then you may also elect to take the two-semester version MATH 15300-15400. A decision to “drop-back” to MATH 15300 should be discussed with your instructor well within the first 3 weeks of classes (the earlier the better).

IUPUI DEPARTMENT OF MATHEMATICAL SCIENCES CALCULATOR POLICY:
- In all developmental and introductory courses at IUPUI numbered below 16500, the only technology that can be used on in-class, closed-book assessments (problem sets, exams, and final exam) is the *Texas Instruments TI-30XA* scientific calculator.
- In all calculus and calculus-related courses at IUPUI with numbers 16500 or above, no calculators or other forms of technology can be used on in-class, closed-books assessments (exams, final)
- For math/stat courses with numbers above 26600, it is up to the instructor's discretion as to what forms of technology may be used on in-class, closed-book assessments.

ATTENDANCE: Attendance is required of all students without exception. A student absent from class bears full responsibility for all material covered in class. This includes, but is not limited to, visiting office hours to collect any and all problem sets and/or exams returned during the missed lecture as well as materials that were distributed. Do not expect these materials to be forwarded to you via OnCourse/Canvas or email. Regular attendance is crucial for success in this course.

EMAIL CORRESPONDENCE: All email correspondence should be sent to university faculty using your university e-mail account and not from a non-university email provider such as yahoo, gmail, etc. IUPUI faculty is instructed to only communicate via established university student email accounts. If you wish to receive a reply, check that you are using your university email account.
MATH HELP OUTSIDE OF CLASS: There will not be enough time to answer all questions from the homework assignments, exams, etc… If you need more time to ask questions there are several options for help that are available. First, you can seek help during your instructor’s office hours. Second, tutoring/mentoring is available in the Math Assistance Center (MAC). The MAC is located in Taylor Hall (UC), Room B001. To find out more about the tutoring/mentoring schedule and other general information about the MAC, check out the MAC web page (http://mac.iupui.edu). And lastly, private tutors are available. If you need more information about the above services you can call the Department of Mathematical Sciences at (317) 274-6918, visit the Mathematics Department website at http://math.iupui.edu, or drop by the Mathematics Department Office at LD270.

STUDYING FOR THE CLASS: This is a college class and is much different than one taught in high school. We cover a lot of material and have limited time in class. You should expect to spend at least two hours studying on your own for each hour spent in class. Try to read the section(s) to be covered in class beforehand. Read the section, not like a novel, but like instructions for putting together a clock—very slowly and carefully. Make sure every word makes sense. The most important part of your learning of the material will be the time you spend working outside of class. You cannot expect to digest the material from just seeing it explained in class. Sometimes it will click and the lecture will have been useful—other times the lecture will not make sense until you go over the material later. Talking about mathematics with classmates is very useful.

HOMEWORK: Homework is very important in any math course. There will be daily textbook assignments and it is important that you do them as the material is covered. We will only have time to go over a few problems from each section in class, but the answers to the odd numbered problems are in the back of the book. However, you should try to work through all problems by yourself before consulting your study buddy, study group, the answers in the book or a solution manual. There is also an on-line WebAssign system with exercises tied to the textbook that you may wish to use for additional homework practice. Exercises for the problem sets in this course are algorithmically the same as problems on your homework list. Periodically reviewing errors on old papers is a valuable study skill.

To perform as well as you can in this class, you should expect to spend several hours each day working problems and reading the sections before they are discussed in class. After working through a set of problems, sit back and ask yourself what you have just learned. Is there a common thread, concept, or technique that runs through the assignment? All problems (Homework, Problem Set, and Exam) should be done completely, neatly, and accurately.

PROBLEM SETS: To receive full credit for exercises on a problem set, you must show all your work. If you are absent or miss part of the class on the day a problem set is due, that problem set will be counted as zero. During the course, you may find that you must be absent all or part of a class period when a problem set is collected due to personal or family illness, accident, business trip, etc. For this reason, only your top ten problem sets will contribute to your grade in this course and be weighted the same as one exam. Absolutely no problem sets will be permitted to be submitted early except for the following documented situations: 1) IUPUI sponsored event, for example athletic competition, 2) US military training or deployment, and 3) jury duty. Documentation must be provided and the problem set must be submitted in advance. No problem set will be accepted late. THERE ARE NO EXCEPTIONS. If your work on a problem set is copied, illegible, or does not show all the work, then no credit will be given.

IN-CLASS EXAMS: To receive full credit for exercises on an exam, you must show all your work. There will be six in-class exams. Each exam will be based on 100 points. If you are absent the day of an exam, that exam will be counted as zero. During the course, you may find that you must be absent the day of an exam due to personal or family illness, accident, business trip, etc. For this reason, you are allowed to drop one exam score. Absolutely no make-up exams will be given except for the following documented situations: 1) IUPUI sponsored event, for example athletic competition, 2) US military training or deployment, and 3) jury duty. Documentation must be provided in advance. THERE ARE NO EXCEPTIONS. The purpose of the dropped problem sets and dropped exam is not to boost or artificially inflate your grade, but rather to give you some flexibility in the event a personal situation prevents you from being present on the day a problem set is due or that an exam is administered.
FINAL EXAM: The common departmental final exam will be on Friday, December 11, 2015, from 6:00P-8:00P. The location will be announced later. The MATH 15900 final exam is a departmental comprehensive exam. It will be worth 200 points, i.e., it will be weighted the same as two in-class exams. More information about the common departmental final exam (practice problems, practice finals, etc.) can be found on the Math 15900 course web pages at http://math.iupui.edu/courses/math-15900 or by visiting the Math Department web page http://math.iupui.edu (click on the “UNDERGRADUATE” tab, then “COURSES” for a list of all courses). The IUPUI university final exam schedule can be found at: http://registrar.iupui.edu/accal.html. No make-ups will be given except for the following documented situations: 1) IUPUI sponsored event, for example athletic competition, 2) military training or deployment, and 3) jury duty. Documentation must be provided in advance.

REMINDER: To receive credit for exercises on problem sets and/or exams, you must show all your work. Check your answers carefully before submitting your problem set/exam. Problems involving units must have the units represented on the answer to receive full credit. Keep all returned graded problem sets and exams until after you receive your final course grade. Throughout the semester, scores will be entered in OnCourse and you should immediately call to your instructor’s attention any discrepancies between the grade entered and the grade you have received on a returned paper. Your current grade will always be visible in OnCourse so that you can easily see how well you are performing in the class.

GRADING: To perform well in this course you must not only understand the mathematical concepts, you must be able to use them correctly in solving problems. Accurate computations go together with understanding the method. MATH 15900 is a prerequisite for MATH 16500-16600, Analytic Geometry and Calculus I & II, MATH 17100, Multidimensional Mathematics, MATH 22100-22200, Calculus for Technology I & II, MATH 23100-23200, Calculus for Life Sciences I & II and all physics courses. It is important to get into the habit (the earlier the better) of checking your work before submitting it to be evaluated by someone else. You will find this habit to be very valuable in your later courses.

GRADES: Your letter grade for the course will be determined from your total scores which will be computed as follows. Exam scores and/or the final course grades may be adjusted.

<table>
<thead>
<tr>
<th>TOTAL POSSIBLE POINTS</th>
<th>GRADES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Best 5 out of 6 in-class exams 500</td>
<td>720-800 A's</td>
</tr>
<tr>
<td>Problem Sets 100</td>
<td>640-719 B's</td>
</tr>
<tr>
<td>Final exam 200</td>
<td>560-639 C's</td>
</tr>
<tr>
<td>Total 800</td>
<td>480-559 D's</td>
</tr>
<tr>
<td>0 - 479</td>
<td>F</td>
</tr>
</tbody>
</table>

Pluses and minuses will be awarded on the final grades.

IUPUI CAMPUS-WIDE COURSE POLICES: Students are expected to read carefully the IUPUI course policies concerning attendance, academics, and conduct. Students are expected to visit the Office of the Registrar’s website for university course policies at http://registrar.iupui.edu/course_policies.html within the first few days of classes as some policies have early deadlines. Information on university campus-wide course policies related to attendance (Administrative Withdrawal, Disabilities, Emergency Withdrawal, Military Service, Religious Holidays), academic policies (Auditing a class, Final Exam Scheduling, Grade Replacement, Grade Forgiveness, and Pass/Fail Option), and conduct (Academic Integrity, Academic Misconduct, and Code of Conduct) and related policies can also be accessed through Oncourse/Canvas under the “Campus Course Policies” link.

FLAGs EARLY STUDENT PERFORMANCE ALERT: This semester your instructor will be using the FLAGs System to provide real-time feedback on your performance in this course. Periodically throughout the semester the instructor will be entering data on factors such as your class attendance, participation, and success with coursework, among other things. This information will provide feedback on how you are faring in the course and offer you suggestions on how you might be able to improve your performance. You will be able to access this information in the student center: Student Services page > Student Center > My Academics and Grades > My Grades. http://registrar.iupui.edu/flag_eas.html
LAST WITHDRAW DATE: November 13, 2015 (Friday) advisor and instructor (or math department member) signatures required. November 13 is the last date to withdraw for Fall 2015. "Withdrawal after this date requires extraordinary circumstances and rarely is granted. Poor performance in a course is not considered grounds for a late withdrawal."--IUPUI Registrar's Office. If you stop attending class without officially withdrawing by the last withdraw date, your grade will be an F for the course. If you find it necessary to withdraw from the course, we encourage you to first talk to your instructor or to your advisor so that they can assist you in deciding what alternative options best fit your needs.

ADMINISTRATIVE WITHDRAWAL POLICY: A basic requirement of this course is that you will participate in all class meetings and conscientiously complete all required course activities and/or assignments. Keep in touch with your instructor if you are unable to attend, participate, or complete an assignment on time. If you miss more than half of the required activities within the first 25% of the course without contacting your instructor, you may be administratively withdrawn from this course. Administrative withdrawal may have academic, financial, and financial aid implications. Administrative withdrawal will take place after the full refund period, and if you are administratively withdrawn from the course you will not be eligible for a tuition refund. If you have questions about the administrative withdrawal policy at any point during the semester, please contact your instructor. http://registrar.iupui.edu/withdrawal-policy.html

UNIVERSITY COLLEGE FRESHMAN DROP POLICY: University College first-year students (25 credit hours or below) may not drop more than one course per semester. This policy will be enforced through advisor sign-off on drop requests. This policy does not include course adjustments made during the first week of class nor does it apply to classes in which a student has been administratively withdrawn.

GENERAL WITHDRAWAL POLICY: If you decide to withdraw from the course, be sure to process all paperwork by the appropriate deadlines outlined in the following table:

<table>
<thead>
<tr>
<th>Times</th>
<th>Required Signatures</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Week</td>
<td>None</td>
</tr>
<tr>
<td>After First Week</td>
<td>Advisor</td>
</tr>
<tr>
<td>1/2 mark of Semester</td>
<td>Advisor and Instructor</td>
</tr>
<tr>
<td>3/4 mark of Semester</td>
<td>Associate Chair, LD 270*</td>
</tr>
</tbody>
</table>

Official details can be found at: http://registrar.iupui.edu/accal.html

* After the 3/4 mark of the semester, course instructors cannot sign a drop slip. The student must see the Associate Chair of the Department of Mathematical Sciences. The School of Science Dean’s Office will not endorse a withdrawal after the 3/4 mark of the semester for students unless an extremely serious and documentable excuse is established.

INCOMPLETEs: Grades of Incomplete will only be given in accordance with the university policy available at http://registrar.iupui.edu/incomp.html. Specifically, students must be passing at the 3/4 mark of the semester to qualify for assigning an incomplete. The instructor must agree that an incomplete is appropriate and it must be approved by the Associate Chair of the Department of Mathematical Sciences.

ACCOMMODATIONS: Students needing accommodations because of a disability will need to register with Adaptive Educational Services (AES) and complete the appropriate forms issued by AES before accommodations will be given. The AES office is located in Taylor Hall, UC 100. You can also reach the office by calling (317) 274-3241. Visit http://aes.iupui.edu/ for more information.

REQUEST FOR COURSE ACCOMMODATION DUE TO RELIGIOUS OBSERVANCE: Students seeking accommodation for religious observances MUST make a request in writing by the end of the 2nd week of the semester to the course instructor and MUST use the IUPUI Registrar’s “Request for Course Accommodation Due to Religious Observation Form” (see http://registrar.iupui.edu/religiousholidayform.html). Make-up exams must be taken prior to the regularly scheduled exam date and time. Failure to comply with the university policy will result in no accommodations given later in the semester.

DISHONESTY AND STUDENT MISCONDUCT: The IUPUI Department of Mathematical Sciences expects all students to adhere to the regulations put forth in the “IUPUI Code of Student Rights, Responsibilities, and Conduct” concerning academic misconduct or personal misconduct. Procedures for imposing academic and disciplinary sanctions are outlined in the Code. The Code can be found at: http://life.iupui.edu/conduct/
