Interpretation guidelines

The highest value represents "Strongly Agree" while the value "1" represents "Strongly Disagree". Keep in mind that students completing their course evaluations does not necessarily mean they answered each question. As a result, for some items, you may notice that the total number of responses is lower than it is for others. In these cases, the student decided to skip this question. Students also may have skipped the open-ended questions, thus leaving you with fewer responses in these sections.

Awesome professor.
I like your teaching style but there isn't enough practice in the class and the pace is so fast it's hard to keep up not taking let alone understanding the material
Professor Yattselev is a very effective teacher. He has definitely been one of my favorites to study under this semester.
Really enjoyed this course and truly learned a great deal
I enjoyed this class very much and the instructor was the best coming from struggling to understand Geller in multidimensional to finishing the quizzes rather quickly in this class it was a great change that i was very glad about and it helped me understand a lot about differential equations.
Overall good professor and experience compared to past math classes
I enjoyed his teaching style. He made sure to cover applicable examples in class that helped with quizzes and homework.
I absolutely loved taking this course. While the material was quite mediocre in terms of interest for me, my professor did a fantastic job making the course entertaining and connecting material to real world concepts and devices.
Excellent teaching! Super helpful!
really enjoyed class with him the semester! really went out of his way to insure his students were understanding the material!
Professor Yattselev is a great professor. Always easy to approach and clearly teaches his lectures.
Very well run class.
