Interpretation guidelines

The highest value represents "Strongly Agree" while the value "1" represents "Strongly Disagree". Keep in mind that students completing their course evaluations does not necessarily mean they answered each question. As a result, for some items, you may notice that the total number of responses is lower than it is for others. In these cases, the student decided to skip this question. Students also may have skipped the open-ended questions, thus leaving you with fewer responses in these sections.

when students don't show up to the class for what ever reason he makes sure that the ones who do know what's happening and how to do it
Math 16500 is a great course with a good professor. Professor Maxim cares deeply about how his students perform in his class. He is willing to work with anyone to ensure help is received. I know that people would complain about his Ukrainian accent. With that being said, he communicates very well and is easily understandable– even writing on the board of what he is saying to ensure his message gets across. Another thing that I enjoy about this course is that it is very reflective of how much work you put into learning the material. Since he chooses the quiz problems from the homework, it gauges the amount of attention you are giving this course outside of class time. This leads me to say that he tries to make the course one that you do not need to worry about as long as you practice everything outside of class and ask for help when needed. I highly recommend Professor Maxim to anyone who is learning Calculus. If he teaches another math course in the future I have to take, I will definitely take it with him if he is the listed professor.
Very straightforward calculus class.
