I love Yattselev's teaching style of introducing a concept and then working example after example. I'm not sure about other students, but this is really the best way for me to learn, so I think the lectures are definitely effective.

Instructor moves through material too fast, can explain ideas well once students get used to accent.

Overall I'm satisfied with the course.

Very good instructor, wish that I could take him for another class!

great course and professor!
