Interpretation guidelines

The highest value represents "Strongly Agree" while the value "1" represents "Strongly Disagree". Keep in mind that students completing their course evaluations does not necessarily mean they answered each question. As a result, for some items, you may notice that the total number of responses is lower than it is for others. In these cases, the student decided to skip this question. Students also may have skipped the open-ended questions, thus leaving you with fewer responses in these sections.

<td>I can tell that Professor Yattselev makes a great effort to be a great teacher and he is. He is very organized, makes himself available, and patient. I like how most of the examples in class are easier than the homework problems and even though I have not finished all the homework assignments, I like the fact that he assigns a good number of problems. Some fellow graduate students complain about that, but I think that is very good. In my opinion that makes my experience more interesting and pushes me to work hard. Thank you for that. I emailed him many times and every single time he emailed me back and very quickly. His lectures are clear and he tries to read our faces to know if we are following what he is explaining. Overall, I think he does a great job. The professor is an amazing, supportive, cooperative and very helpful person.</td>

<td>Not sure if Ahlfors is the best book. I think it was not a good idea to start with the homework without fixed deadlines. The homework problems are pretty interesting. I think the experience with the online classes is better than the one offline due to encouraging the students to read ahead. I mean everyone knows it might make sense to read the material ahead of time but hearing it each lecture again is good. The files for the notes since it is online are pretty big (40Mb) so sometimes they are slow to load. Maybe it would be good to compress or reduce the resolution and add them to one file.</td>
